

Akshtt

Student Developer · Full-Stack · DevOps

India · akshtt.dev@gmail.com · github.com/akshtt-dev · youtube.com/@akshttdveloper

Education

Class 12 — CBSE Board (Expected Graduation: 2026)

Skills

Frontend: Next.js, React, TailwindCSS

Backend: Node.js, Express.js, Prisma

Databases: MongoDB, PostgreSQL

DevOps / Cloud: Docker, NGINX, Google Cloud

Other Tools: Puppeteer, Git/GitHub, Discord.js

Projects

Botnix Cloud — Hosting Platform

Built and deployed a hosting service with a modern Next.js website, live Discord integration, and cloud infrastructure optimized for bots, web apps, and game servers.

Trust MC — Community Website

Responsive Next.js website with animated UI, Discord member sync, and themed design for a Minecraft roleplay server.

Death Tierlist — Web App

Interactive tierlist platform where users can rank items visually. Built with Next.js + MongoDB for persistent storage.

Trust MC Store — E-commerce Site

Custom store with styled Tailwind invoices and Puppeteer PDF generation for receipts.

Achievements

- Deployed 10+ full-stack apps and Discord bots.
- Achieved 99.9% uptime for hosted services.
- Hosted 100k+ bot commands across communities.
- Featured project in gaming/roleplay communities.
